

Trucking Services

Long Haul

When you have a truckload, less than a truckload, or over-dimensional shipment that needs to be delivered by a specific date, IDI provides the reliable service you need.

IDI owns and operates a fleet of late modeled equipment and works with a select group of proven carriers. Our equipment easily handles standard and non-conforming freight, even if the load is unusually tall or over-dimensional. IDI specializes in flatbed and step-deck LTL.

Our team-driver service is available for the most aggressive delivery schedules and we track your load daily to ensure safe, timely progress. Along the way, we keep you advised so there are never any surprises.

Our Service Advantage

Personal customer service is an IDI priority. Whether an order is placed over the phone, over the fax, or through the IDI web site, the customer service representative assigned to your account personally handles the progress of the shipment and keeps you informed of its status.

IDI provides superior handling services for long-distance shipments on common lanes of operation including:

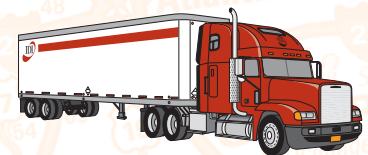

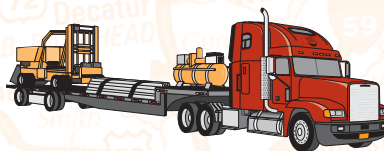

- Flatbed, step-deck and van truckload shipments, and less-than truckload shipments
- Specialized over-dimensional shipments
- Air-ride equipment
- Team service for expedited shipments, offering a less-expensive alternative to costly air-freight shipments. Team drivers cover 1,000 or more miles per day.

IDI can track and trace your shipment so there are no surprises. IDI provides daily tracing of all shipments and weekend on-call service for expedited shipments.

Our Equipment Advantage

IDI has the expertise and updated equipment, most of which has air-ride suspension, to ensure your freight is transported properly, including:

- Step-deck
- Flatbed
- Step-deck Conestoga
- Curtain Van
- Van
- 48' and 53' vans
- Temperature controlled
- Additional specialized equipment available
